

Retrievable Orifice and Dummy Gas Lift Valves

Tejas also offers retrievable dummy valves in 1" and 1-1/2" industry standard sizes. These dummy valves serve to isolate the tubing from the casing annulus. The 1" sizes are available with integral bottom latch or top latch.

Tejas offers both 1" and 1-1/2" single-point-injection gas lift orifice valves for use in continuous gas lift installations.

Latch recommendations and available trim sizes.
